

it's about Fresh Air

With Fresh Air by EcoQuest, all you need is the air that you breathe to...

Eliminate smoke from the air, automatically.

Knock out odors for a fresh, clean smell without cover-ups.

Conveniently kill bacteria, viruses, and mold on surfaces 24/7 for a safer, healthier home.

Fresh Air by EcoQuest is like 24/7 healthy home insurance. It is the core of EcoQuest's total protection package for whole-home environmental conditioning. Fresh Air is always working - sending out an active army of safe and natural ions, and germ-killing, odor-reducing, oxygen-rich "scrubbers" to make your home safer and healthier.

it's about healthier spaces

Have you ever thought about what's really going on in your home?

Busy lives can result in frantic dinners that can leave as much smoke in the air as Grandpa's premium stogies. Garbage cans are funky, and the smell of leftover spicy food can linger for days. Little ones bring the day's germs home with them, and spread them just about everywhere. And pets... who knows what surprises they'll share next?

Now imagine eliminating that pollution at the source. We're not talking about spraying a germ-killing cloud of flower-fragranced chemicals. Our solution is as easy as pushing a button to keep things smelling fresh, clean, and safer to touch. Just like outside, Fresh Air's ActivePure technology destroys odors, eliminates smoke, and kills the germs ordinary cleaning can leave behind.

With Fresh Air by EcoQuest, all you need is the air that you breathe to make your home healthier for your family.

What is ActivePure?

In short, ActivePure is technology based on how nature keeps things safe and clean outdoors. The natural processes found in thunderstorms, sunlight, and lightning are re-created indoors. ActivePure duplicates nature to safely reduce smoke and odors in the air, and mold and germs on the surfaces where they live.

Published University studies prove ActivePure works.
Summary of Kansas State University Testing Results – Reductions using ActivePure (RCI) technology in 24-hr testing:

- Staph (Staphylococcus aureus)98.5% reduction
- Methicillin Resistant Staph99.8% reduction (Methicillin Resistant Staphylococcus aureus)
- eColi (Escherichia coli)98.1% reduction
- Bacillus spp.99.38% reduction
- Streptococcus spp.96.4% reduction
- Pseudomonas aeruginosa99.0% reduction
- Listeria monocytogenes99.75% reduction
- Candida albicans99.92% reduction
- Stachybotrys chartarum99.93% reduction

*Published scientific testing with Kansas State University has demonstrated the use of EcoQuest's ActivePure technology to substantially reduce microbial populations on surfaces. No claim with respect to airborne microbials is made based on these results. Published scientific testing through the University of Cincinnati has demonstrated the use of EcoQuest's ActivePure technology to substantially reduce airborne contaminants in a controlled environment. Field results may vary based on environmental conditions. These results have not been evaluated by the FDA. This product is not a medical device intended to diagnose, treat, cure, or prevent any disease.
